

Cheat sheet: Functions

Function definition (with return value)

```
def fname(arg1, arg2, ...):  
    """Documentation ..."""  
    ... # function code  
    return result
```

Function definition (no return value)

```
def fname(arg1, arg2, ...):  
    """Documentation ..."""  
    ... # function code
```

Function call storing return value

```
val = fname(arg1, arg2, ...)
```

Function call dropping return value

```
fname(arg1, arg2, ...)
```
